

Department:	Faculty of Information Technology
Course Name	Object-Oriented Programming
Hours per week	6
Number of Credits	6
Course Description	<p>The course uses C++ as the teaching language to introduce the main idea, basic concepts, elements, and terminologies of object-oriented technology, as well as some pragmatic programming techniques useful in object-oriented programming. After taking this course, the students should have a general understanding about object-oriented program design, and be familiar with C++ programming.</p>
